Persona 1 (Manual):
The Technical Car Enthusiast

Name: Alex Chen
Age: 27
Education: Mechanical Engineering Degree
Location: Toronto, Canada
Marital Status: Single
Occupation: Automotive Engineer
Income: $80k – $100k

Needs & Goals

- Quickly locate technical specifications
- Compare performance metrics between models
- Understand engineering innovations

Motivations

- Passion for automotive engineering
- Enjoys analyzing horsepower, torque, drivetrain systems

Frustrations / Pain Points

- Specs buried at bottom of long pages
- No comparison tool between models
- Too much scrolling

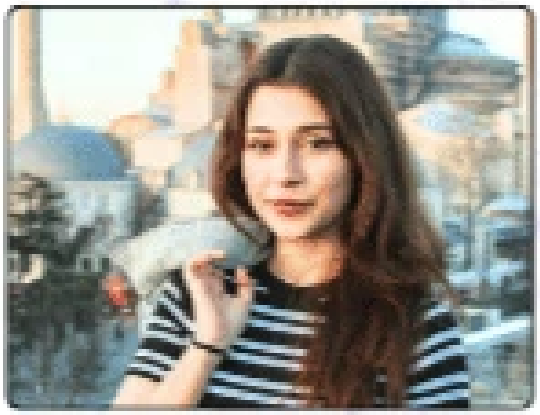

Bibliography

Alex is a technically knowledgeable automotive enthusiast who regularly follows high-performance engineering developments. He visits automotive websites monthly to analyze specifications, compare performance data, and learn about innovative technologies used in hypercars.

3

Persona 2 (AI):
The Luxury Brand Follower

Name: Sophia Martinez
Age: 25
Education: Business Administration Degree
Location: Miami, USA
Marital Status: In a relationship
Occupation: Marketing Coordinator
Income: $55k – $70k

Needs & Goals

- Explore brand story and innovation
- See latest car models
- Understand brand prestige

Motivations

- Interest in luxury culture
- Social media influence

Frustrations / Pain Points

- Unclear purchase or inquiry process
- Difficult to compare vehicles

Bibliography

Sophia Martinez is a 25-year-old marketing coordinator who enjoys following luxury brands and lifestyle trends. She occasionally visits high-end automotive websites to explore new car models, brand stories, and innovations. Sophia is drawn to visually polished websites that reflect exclusivity and strong branding. While she appreciates learning about the cars, she is less focused on technical specifications and more interested in the overall brand experience.

Persona 3 (AI):
The Visual Explorer

Name: Jordan Patel
Age: 22
Education: University Student (Design Major)
Location: Vancouver, Canada
Marital Status: Single
Occupation: Student / Freelance Designer
Income: $15k – $30k

Needs & Goals

- Explore brand story and innovation
- See latest car models
- Understand brand prestige

Motivations

- Interest in luxury culture
- Social media influence

Frustrations / Pain Points

- Unclear purchase or inquiry process
- Difficult to compare vehicles

Bibliography

Jordan Patel is a 22-year-old design student who enjoys exploring visually impressive websites for creative inspiration. He is interested in luxury brands like Koenigsegg mainly because of their unique design, storytelling, and cinematic visuals. When visiting automotive websites, Jordan focuses more on imagery, layout, and overall aesthetic rather than detailed engineering information. He enjoys scrolling through galleries, animations, and high-quality visuals that showcase the cars.

6

Persona 4:(Manual)
The Curious Casual Visitor

Name: Sam Okibleh
Age: 20
Education: College Student
Location: Chicago, USA
Marital Status: Single
Occupation: Student
Income: <$20k

Needs & Goals

- Learn about cool hypercars
- See specs and performance numbers

Motivations

- Curiosity
- Interest in high-performance cars

Frustrations / Pain Points

- Important info appears after long scrolling
- Dealer contact hard to find

Bibliography

Sam Okibleh is a 20-year-old college student who occasionally visits luxury automotive websites after seeing hypercars on social media or YouTube. He is fascinated by the futuristic design and extreme performance of brands like Koenigsegg but does not have deep technical knowledge of automotive engineering. When browsing, he prefers quick highlights such as horsepower, top speed, and unique design features rather than detailed technical explanations. He enjoys the immersive visuals and premium feel of the website.

Empathy Map 1 (Manual): **Alex Chen**

SAYS

- "I want to see horsepower, torque, and acceleration numbers quickly."
- "Why are the specs buried so far down the page?"
- "I wish there was a side-by-side comparison."
- "Opening multiple tabs just to compare specs is inefficient."
- "The engineering information is interesting, but it's hard to locate."

THINKS

- "This website prioritizes storytelling over technical efficiency."
- "I should be able to scan specs in a table."
- "If I want to compare two models, I shouldn't need to memorize numbers."
- "There must be a faster way to navigate these sections."
- "Anchor navigation would make this much easier."

FEELS

- "This website prioritizes storytelling over technical efficiency."
- "I should be able to scan specs in a table."
- "If I want to compare two models, I shouldn't need to memorize numbers."
- "There must be a faster way to navigate these sections."
- "Anchor navigation would make this much easier."

DOES

- Scrolls quickly to find specification sections
- Opens several model pages simultaneously
- Compares numbers like horsepower, torque, and acceleration
- Skims long storytelling sections to find technical information
- Repeatedly scrolls back up to navigation menus
- Looks for a contact or dealership page

7

Empathy Map 2 (AI): **Sophia Martinez**

SAYS

- "This brand looks very exclusive."
- "The website design feels very premium."
- "These cars seem incredibly advanced."
- "Where would someone go if they wanted to buy one?"
- "I wish there was a clearer way to contact the brand."

THINKS

- "This brand must be extremely expensive."
- "The storytelling makes the cars feel like luxury art."
- "The visuals are amazing but I'm not sure where to go next."
- "The site focuses more on branding than purchasing."
- "I want to explore more but navigation isn't very clear."

FEELS

- Impressed by the luxury aesthetic
- Curious about the brand's innovation and reputation
- Engaged by the storytelling and imagery
- Slightly confused about next steps
- Interested but not deeply analytical

DOES

- Browses brand history and innovation pages
- Scrolls through model pages casually
- Watches animations and visual transitions
- Looks for product highlights or specifications
- Searches navigation menus for purchase or inquiry options

8

Empathy Map 3 (AI): **Jordan Patel**

SAYS

- "The visuals on this site are incredible."
- "It feels like a digital showroom."
- "Some text is hard to read over the images."
- "I mostly just want to explore the design."
- "This site looks like a cinematic experience."

THINKS

- ""This would be great inspiration for design projects."
- "The animations make the site feel immersive."
- "Some information feels hidden within the visuals."
- "The layout is beautiful but not always easy to read."
- "The design feels more like storytelling than a product page."

FEELS

- Inspired by the visual storytelling
- Engaged with the immersive aesthetic
- Curious about the vehicles
- Occasionally distracted by the heavy visuals
- Slightly frustrated when text contrast makes reading difficult

DOES

- Slowly scrolls through pages to view images
- Pays attention to animations and transitions
- Focuses on visual sections more than text
- Screenshots or shares interesting visuals
- Occasionally reads specifications out of curiosity

9

Empathy Map 4 (Manual): **Sam Okibleh**

SAYS

- "These cars look insane."
- "I didn't know hypercars had this much technology."
- "Where can I see all the specs?"
- "Why do I have to scroll so much?"
- "How do you contact the company?"

THINKS

- "This site looks cool but it's a lot to navigate."
- "I just want the main facts about the car."
- "The design is impressive but I want quicker information."
- "I'm not sure where the next step is."
- "There should be a clear way to contact the brand."

FEELS

- Excited by the futuristic cars
- Curious about performance numbers
- Overwhelmed by long pages
- Slightly confused about navigation
- Impatient when information takes too long to find

DOES

- Scrolls quickly through pages
- Searches for key specs like horsepower and top speed
- Clicks between different model pages
- Looks for quick highlights instead of long explanations
- Leaves the site if information is difficult to locate

10

Journey Map 1 (Manual): **Technical Car Enthusiast**

Journey Element	Discover	Explore	Evaluate	Decide
Actions	Searches for Koenigsegg or a specific model on Google. Clicks the official website link. Lands on the homepage and scans the navigation menu.	Opens model pages such as Jesko or Gemera. Scrolls through long storytelling sections. Looks for specification sections and performance details.	Opens multiple model pages in separate tabs. Attempts to compare horsepower, torque, drivetrain, and acceleration numbers manually. Revisits specification sections repeatedly.	Searches for dealership information or inquiry options. Looks for a contact form or "Find Dealer" section. Attempts to determine the next step for contacting the brand.
Feelings / Emotions	Curious and excited to explore high-performance vehicles.	Interested but slightly impatient while searching for information.	Frustrated by inefficient comparison process.	Confused and uncertain about how to proceed.
Pain Points	None at this stage. Entry into the site is straightforward.	Technical specifications appear near the bottom of long pages. Important information is embedded within storytelling sections.	No side-by-side comparison feature available. Requires opening multiple tabs and manually remembering data.	Dealer contact information is hidden in the footer and not immediately visible. Purchase or inquiry pathway is unclear.
Opportunities for Improvement	Highlight vehicle models more prominently on the homepage to guide exploration quickly.	Introduce anchor navigation allowing users to jump directly to sections such as Overview, Engineering, Specifications, and Gallery.	Implement a side-by-side model comparison tool displaying key specs in structured tables.	Make "Find Dealer" a primary call-to-action in the main navigation or header area to guide users toward the next step.

Journey Map 2 (AI): **Visual Explorer**

Journey Element	Discover	Explore	Evaluate	Decide
Actions	Visits the Koenigsegg homepage after searching online or clicking a shared link. Observes the hero images and large cinematic visuals. Quickly scans the navigation menu.	Scrolls through the page to view images, videos, and animations. Opens different model pages and explores design galleries and storytelling sections.	Begins searching for vehicle specifications and performance highlights. Scrolls further through the page to locate technical details and model information.	Looks for ways to learn more about the brand or contact a dealer. Searches the navigation and footer for inquiry or dealer information.
Feelings / Emotions	Excited and impressed by the visual design and premium aesthetic.	Inspired and engaged by the immersive storytelling and imagery.	Curious about the engineering but slightly impatient while searching for details.	Confused or uncertain about how to proceed to the next step.
Pain Points	None initially because the landing page creates a strong first impression.	Long scroll-based pages make it difficult to quickly navigate between sections.	Technical information is buried within storytelling sections and not easy to locate quickly.	Dealer contact information is hidden in the footer and the next step is not clearly communicated.
Opportunities for Improvement	Continue emphasizing strong visual storytelling to capture attention and reinforce brand identity.	Introduce quick navigation tools such as anchor links or section menus to help users jump between parts of the page.	Add highlighted specification summaries or quick facts near the top of model pages.	Make "Find Dealer" or "Request Information" a clear primary call-to-action in the header or navigation bar.

AI Transparency Statement

Generative AI tools (ChatGPT and Gemini) were used as assistive tools to support the synthesis and structuring of UX artifacts. AI assisted in organizing persona attributes, brainstorming empathy map elements, and refining language clarity. All final personas, empathy maps, and customer journey maps were grounded in original interview research conducted by the authors and were interpreted and designed manually by the students.
